

Project Sprint Planning Notes

Team: FRI – 10:30 - 5

Sprint: 3

Date: 21/09/20

Attended:

Scrum Master: Shaunak Karuna, Ruchelle Balasuriya

Product Owner: Amir Homayoon Ashrafzadeh

Development team: Amna Alfarah Alonto (s3778713), Julian Bitetto (s3690935), Ruchelle Balasuriya

(s3781183), Sebastian Wisidagama (s3769969), Shaunak Karuna (s3782215)

1.Goal

The team goal for this sprint is to finish off admin functionality. The admin should be able to confirm and cancel upcoming bookings while also being able to view all past bookings. We need to implement our 'login' and 'register' features by validating appropriately on the front-end while using JWT on the back end. We will also complete working hours rosters for employees and fix any bugs with the booking functionality. We also plan to tidy up our user interface to make it look nicer and also to improve its user-friendliness.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

All items relating to register and sign-up will be added to the sprint backlog along with past bookings and upcoming bookings functionality. By the end of this sprint we aim to have most admin functionality working, bookings bugs to be fixed, our 'register' and 'log in' features working properly. We also aim to present a cleaner and more user friendly product to the product owner at the conclusion of this sprint.

4. Estimation in story points

The expected story points for this sprint is 39 story points (39 hours of work).
